

Construction Viz is a powerful and flexible project management solution trusted by leading construction management and utility companies to manage multi-billion-dollar projects. Available in the cloud, on-premise, or as à la carte apps for **SharePoint Online** and **Microsoft 365**.

Optimized for You & Your Workflow

Choose the features you want and where your data is hosted. You can upgrade or add users whenever you are ready. No other platform gives you the same level of control.

One Solution to Manage it All

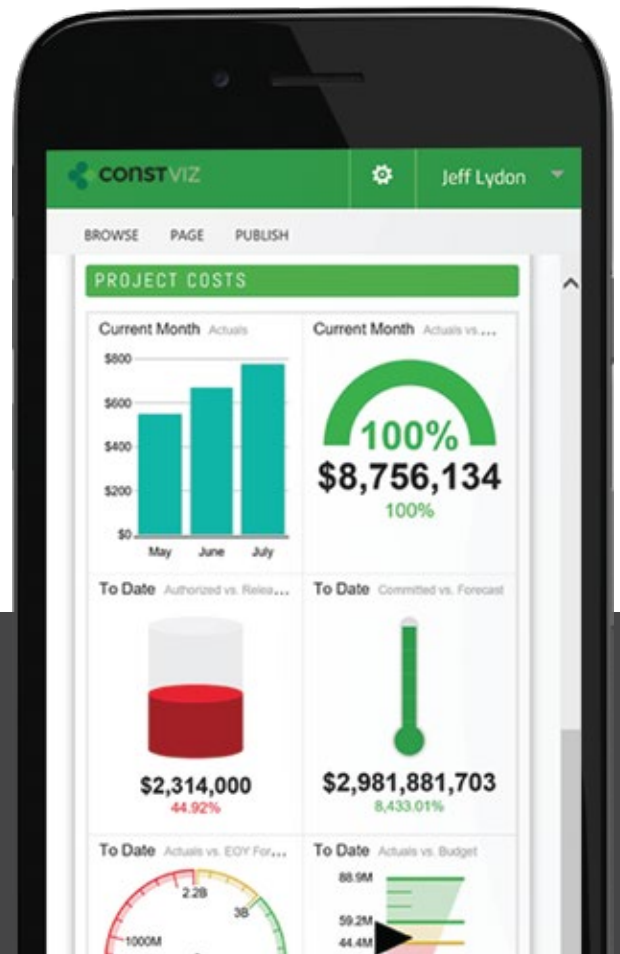

Get all the data you need to manage your construction projects in one place, no matter where it originates. See everything you need to stay on schedule and within budget at a glance.

All the Tools You Require

- Reports, dashboards & KPIs
- Built-in integration with Microsoft 365
- Prebuilt construction forms
- Easy customization
- Security down to the field-level
- Integration with P6, SAP, ArcGIS & more

Complete Mobile Solution

Experience a seamless mobile-first experience with full offline support. Use your preferred browser and device to access and update mobile forms and reports—even if you don't have internet access.

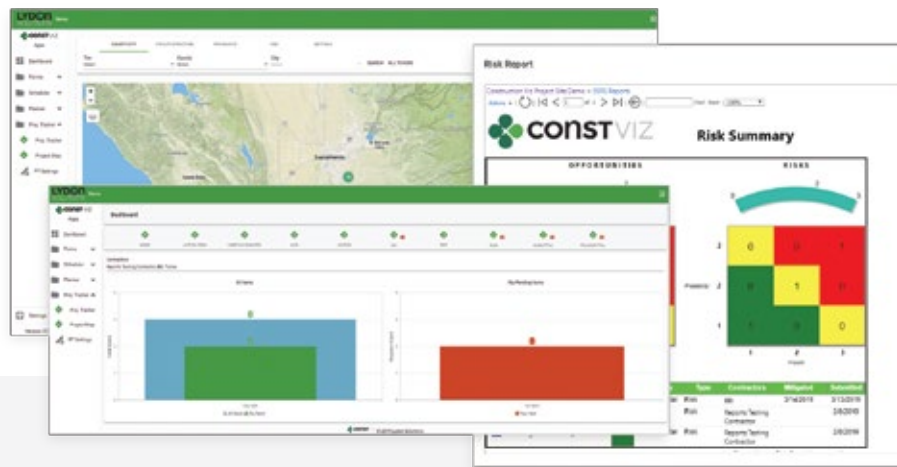

Powered by Technologies You Trust

Powerful Reports & Dashboards

Construction Viz makes it simple to display critical project data in a visually compelling way. Built-in custom reporting tools let you create project reports with dynamic charts, tables, graphs, heat maps, and more.

Construction Viz Apps

Get the ultimate in construction project management flexibility. Our new Construction Viz Apps give you the option to easily deploy just the features you want right in **SharePoint Online** and **Microsoft 365**.

Each app works as a standalone solution with everything you need, including forms, logs, reports, search, and more. Or deploy multiple apps with seamless integration for even more features and convenience.

About Lydon Solutions

Lydon Solutions is a WBE SharePoint consulting group founded in 2009 with offices in Orange County, CA and Kennewick, WA.

Our team is made up of both construction and IT professionals with a passion for applying cutting-edge technologies to the real-world challenges of the construction industry.

Project Tracker

Keep everything you need to know about your project at your fingertips in interactive dashboards with logs, reports, search, and more.

Form Apps

Leverage a library of mobile responsive construction forms (Submittals, Transmittal, RFIs, SOVs, Change Requests, Risks, etc.) with built-in permissions, comments, workflows, reminders, and more.

GIS Map Apps

See where your project is happening. Use geospatial data to create interactive maps with linked photos, videos, libraries, and more.

Scheduler App

Stay on schedule with a simple yet powerful tool to manage and assign resources. Includes Gantt charts, critical path, Microsoft Project import and more.
